Food Ordering Website Features Overview

1. **Timer Display:**
 - Shows a countdown timer indicating session duration for user awareness.
2. **Theme Customization:**
 - Offers three theme options (Default, Dark, Light) for user interface personalization.
3. **Menu & Cart Management:**
 - Lists food items with images, names, and prices.
 - Enables adding/removing items from a cart with real-time price updates.
4. **Review System:**
 - Allows users to submit reviews via text input.
 - Displays submitted reviews for transparency and user feedback.
5. **Order Confirmation & Payment:**
 - Presents an order summary modal with selected items and total cost.
 - Simulates a payment confirmation process for user interaction.
6. **Responsive Design:**
 - Ensures usability across devices with responsive layout and intuitive styling.
7. **Modal Interaction:**
 - Uses modal windows for focused actions like order confirmation and review submission.
8. **Customized CSS Styling:**
 - Enhances visual appeal and usability through tailored color schemes and button designs.

This website integrates essential features for seamless food ordering, enhancing user engagement and convenience while maintaining a visually appealing interface.
